

Appl. No. : **10/574,740**
Filed : **January 22, 2007**

SUMMARY OF INTERVIEW

Attendees, Date and Type of Interview

Applicants wish to thank Examiner Ibrahim for the courtesy extended during the interview conducted via telephone on February 23, 2009. Examiner Medina Ibrahim and Applicants' attorneys, Kerry Taylor and Raj Advani, participated in the telephone interview.

Exhibits and/or Demonstrations

No exhibits and/or demonstrations were discussed.

Identification of Claims Discussed

All claims were discussed.

Identification of Prior Art Discussed

No prior art was discussed.

Proposed Amendments

Proposed amendments were discussed.

Principal Arguments and Other Matters

The previously set forth enablement and written description rejections were discussed. Applicants' attorneys argued that claims reciting promoter regions having "at least 95%" sequence identity to SEQ ID NOS: 1 and/or 2 were fully enabled and adequately described by the specification.

Results of Interview

The Examiner indicated that claims reciting promoter regions having "at least 98%" sequence identity to SEQ ID NOS: 1 and/or 2 or having ""at least 98%" sequence identity to SEQ ID NO: 3 would overcome the outstanding enablement and written description rejections.
